

Hunter Schofield

Company **Regional Municipality of York**

Position **Full-Stack Developer**

- Environmental Services

As a 2nd year Space Engineering student, Hunter secured a 16-month work term at the Regional Municipality of York where he worked on a variety of applications for Environmental Services. He made exceptional contributions to the municipality including optimizing an organizational chart system to improve user experience. He also collaborated on a Street Tree Planting & Establishment Contract Administration System for efficient management & maintenance of trees in the region. His contributions, along with his technical expertise, earned the project recognition from the Commissioner and a nomination for the external IT Project of the Year award.

“His demonstrated leadership, technical expertise and vision have made a positive impact on our projects and I have no doubt that this will continue in his future endeavors.”

– Olga Lawton, Program Manager, Technology Projects & System Support

Additionally, Hunter has founded his own software development startup, “6Side”, which is focused on enhancing traditional marketing by integrating innovative technologies.

Congratulations Hunter!
