Hosted by:

- Geomatics Engineering and Lassonde School of Engineering
- CIG Toronto Branch

Speaker:

Dr. Kevin Lim

Ph.D.

Founder and CEO of
Lim Geomatics Inc.

Dr. Kevin Lim is the founder and CEO of Lim Geomatics Inc. The company was founded in 2006 to commercialize Dr. Lim's Ph.D. research in airborne lidar and its application to forest inventory and has since grown to employ 20 staff across its two offices located in Ottawa and Calgary. Lim Geomatics was recently recognized as one of Canada's fastest growing companies with its inclusion on the Canadian Business 2020 Growth List.

With its focus on building geospatial software and data to help forestry companies be more efficient with their in-office and field operations, Lim Geomatics has emerged as an industry leader in the forestry market with how it leverages GIS, remote sensing, IoT and AI to increase the bottom line for its forestry customers in Canada, USA and South Africa.

Lim Geomatics remains a bootstrapped company to this day and in this talk, Dr. Lim will share his experiences with his entrepreneurship journey that has spanned over the last 15 years. Dr. Lim received his Ph.D. from Queen's University in 2006 and lives in Ottawa.
